The Sportsman 500 H.O. features a center mounted, digital instrument pod that tells a rider everything they need to know about fuel level, gearing, mph, RPM, and even maintenance items. The

pod also has a simple choke knob to help with starting on cold mornings, and once running the rider really never needs to take their hands off the bars. We would love to see Polaris ditch the huge thumb throttle assembly for the compact unit found on the XP models though.
