Previous modeling studies of hurricane landfall have focused on the sensitivity of the hurricane to surface boundary conditions and not dry air intrusion (e.g., Tuleya and Kurihara 1978; Tuleya et al. 1984; Tuleya 1994). Bender et al. (1987) modeled the effects of island terrain on tropical cyclones and observed how dry air intrusion from above mountaintops caused the model storms to weaken.
