...

One of my favorite music theory books to come out in years is Music Theory Remixed, since it includes jazz, pop, and rock, analysis in addition to the typical masterworks that we are accustomed to seeing in general music theory texts. This textbook covers the traditional four semesters of music theory, from intervals to post-tonal theory and serialism.

Best Music Theory Books for Beginners: Top Picks

Designed for today's undergraduate music students, *Music Theory Remixed: A Blended Approach for the Practicing Musician* presents tonal music theory through a dual lens of works from the Western canon and examples from popular music, including rock, jazz, techno, film soundtracks, and world music. With exceptional clarity, it balances the study of traditional part-writing with the development of essential skills like score analysis and identification of historical style.
