Biology - 10.4 Evidence of Evolution | Science Flashcards ...

One piece of evidence offered by Darwin is found in the science of paleontology. Paleontology deals with locating, cataloging, and interpreting the life forms that existed in past millennia. It is the study of fossils—the bones, shells, teeth, and other remains of organisms, or evidence of ancient organisms, that have survived over eons of time. Paleontology supports the theory of evolution because it shows a descent of modern organisms from common ancestors.
