Methods for assessing ethical, legal, and social implications of health technology have been underdeveloped relative to other methods in HTA, although there has been increased attention in recent years to developing frameworks and other guidance for these analyses (Duthie 2011; Potter 2008).

HTA 101: II. FUNDAMENTAL CONCEPTS

The number of new technologies for risk assessment available in health care is increasing. These technologies are intended to contribute to both improved care practices and improved patient outcomes. To do so however, there is a need to study how new technologies are understood and interpreted by users in clinical practice.
