11.1.2 Properties of recycled concrete aggregates. RCA are mainly derived from crushing and processing of previously used concrete structural elements. RCA contain bricks, tiles, metals, and other mixed materials such as glass, wood, paper, plastic, and debris along with crushed concrete (Ding et al., 2016). RCA are different from virgin aggregate mostly owing to the adhered old cement mortar.

Recycled Concrete Aggregate - an overview | ScienceDirect ...

Recycling concrete helps reduce construction waste and extend the life of landfills as well as saving builders disposal or tipping fees. It also reduces transportation costs because concrete can often be recycled in areas near the demolition or construction site. If builders are seeking LEED Green Building certification, they can receive points for using recycled concrete. In some instances, new employment opportunities arise in a recycling activity that would not otherwise exist.
