Kart Steering, Physical Forces and Setup - Theory and Practice. by James Hughes. Often when asking questions about chassis and steering settings, the usual answer is simply to say changing some setting or other causes an increase or decrease in grip. There is never an explanation of the physical principles involved in causing these changes.

## **Engels: Kart chassis setup**

Many drivers think that the kart's chassis setup can be established in a standard way for each individual track. Nothing could be further from the truth. They may represent a starting point, but many aspects cannot be identified until you actually start driving on the track.

## **Chassis Guide Setup - Italkart**

In order to give more on-power grip off the corner the chassis can be lowered in the rear. The kart then will plant the grip out from the corner. This set up is in many cases used with the gearbox categories. The risk with this setup is that the kart becomes flat in the rear and does not flex (lift the inner wheel) as easily. 2d) Rear Track Width

## **Chassis Setup Guide - Top Kart USA**

The roll center of your chassis is the pivot point around which your chassis rolls. The roll center is controlled by the lateral linkage; this linkage controls the location of the axles under the chassis in the side to side or lateral direction. The roll center axis is an imaginary line drawn from the front RC (roll center) to the rear RC.

## **Rethink Dirt: Advanced Theory - Hyper Racing**

NEVER drive your Kart on any public highway, freeway, street or road. Doing this is illegal and extremely dangerous. If you decide to resell or pass on your IPKARTING Kart, it is your responsibility to pass on all the Safety maintenance information to the next owner/operator. 2017 IPK CHASSIS SETUP GUIDE - REV001 5

## **2017 IPK CHASSIS SETUP GUIDE - REV001 1**

setup is solid and within spec; it doesn't do much good to go chassis testing if your motor controller is not in spec. The final thing to do before leaving for a test is to make a list of the parts and changes you want to test. There is a logical order to doing this, and that is somewhat based on your kart's baseline setup.
