In Unit 1, Linear Functions and Applications, students review and extend the Algebra 1 skills of graphing, manipulating, and describing solutions to linear functions to deepen their understanding of modeling situations using linear functions. In this unit, students review concepts, such as using multiple representations, inverse, constraints, and systems, that are essential for studying polynomial, rational, exponential, and logarithmic functions, and trigonometric functions in later units ...

Unit Test - Slope and Linear Graphs. Multiple Choice (80 points, 5 points each) Identify the choice that best completes the statement or answers the question. 1. Find the slope of the line that passes through the points (2,7) and (2,-6). A. 1 . B. 0 . C. undefined . D. -1 . 2. Find the slope of the line that passes through the points (4,10 ...

Unit Test - Slope and Linear Graphs

In Unit 4, Linear Equations, Inequalities, and Systems, students become proficient at manipulating, identifying features, graphing, and modeling with two-variable linear equations and inequalities. Students are introduced to inverse functions and formalize their understanding on linear systems of equations and inequalities to model and analyze ...

Algebra I has two key ideas that are threads throughout the course. The first idea is that we can construct representations of relationships between two sets of quantities and that these representations, which we call functions, have common traits.

Algebra I Units | Math

This unit investigates linear equations and inequalities. Students create linear equations and inequalities and use them to solve problems. They learn the process of reasoning and justify the steps used to solve simple equations. Students also solve systems of equations and represent linear equations and inequalities graphically. They write linear functions that describe a relationship between two quantities and
