### Modelling Longevity Dynamics for Pensions and Annuity ...

In this article, we assess, through an empirical investigation based on Italian data, how uncertainty regarding future mortality may affect public pension expenditure. Based on a representative sample of Italian pensioners from 1985 to 2011, we find a consistent underestimation of improvements seen in mortality and life expectancy when forecasts are based on expectations.

### The potential costs of Longevity Risk on Public Pensions ...

The life expectancy model is intended to predict the future. ATP Livslang Pension (Lifelong Pension) will be paid your entire life - from the day you retire. No matter what age you reach. In order to live up to that promise, we must be able to project what the future life expectancies of Danes will be.

### Modelling Longevity Dynamics for Pensions and Annuity ...

Policy and decision-making processes are routinely challenged by the complex and dynamic nature of environmental health problems. System dynamics modelling has demonstrated considerable value across a number of different fields to help decision-makers understand and predict the dynamic behaviour of complex systems in support the development of effective policy actions.

### The application of system dynamics modelling to ...

Modelling Longevity Dynamics for Pensions and Annuity Business Mortality improvements, uncertainty in future mortality trends and the relevant impact on life annuities and pension plans constitute important topics in the field of actuarial mathematics and life insurance techniques.

### Modelling Longevity Dynamics for Pensions and Annuity Business

Business model innovation is a process that allows firms to build and maintain competitive advantages. However, it imposes major challenges to managers who rely on incomplete cognitive representations while attempting to understand the environmental dynamics that determine a business model's prospective performance. System Dynamics is a computational approach potentially useful in enhancing ...

### System dynamics for corporate business model innovation ...

Model estimation, based on prices for standardized annuities publicly offered by U.S. insurance companies, shows that aggregate shocks to survival probabilities are predictors for long-term returns of the longevity-linked securities, and reveals an unexpected predictability pattern.
