R134a was and is used as replacement refrigerant besides several "drop-in" refrigerants (refrigerant mixtures). Even today, the conversion from R12 to R134a is still an ongoing topic in the area of classic and modern classic cars as well as in several non-EU countries. In the course of conversion, the system must be checked for leak tightness.

Finally, if a system is OFF and has
approximately 10% of its full charge, as
long as there is some liquid refrigerant
in the system, the pressure gauges will
still show the relevant pressure for the
ambient temperature ie, 70psi at 20 C,
the pressure will drop when there is only
vapour in the system. So recover,
vacuum and charge everytime.
