Police culture has been a topic of study for over forty years. Since the seminal work of William Westley (1970), characterizations of culture have focused on describing the widely shared attitudes, values, and norms that serve to manage the strains created by the nature of police work and the punitive practices of police management and supervision.

Several problems plague contemporary thinking about governance. From the multiple definitions that are often vague and confusing, to the assumption that governance strategies, networks and markets represent attempts by weakening states to maintain control. Rethinking Governance questions this view and seeks to clarify how we understand governance.

Rethinking Global Governance casts fresh eyes upon a once poignant but now languishing concept. Its purpose is to disrupt the simple association between global governance and the actions and activities of international organizations in the post-Cold War era and to focus instead on a set of questions that probe the intricate and multifaceted manner in which the world is governed.
