Every speaker in a car audio system dying at once is very unlikely without some serious abuse, like cranking the volume high enough to blow the speakers out. When all of the speakers in a car audio system all stop working at once, the problem is usually in the head unit, in the amp, or in the wiring.

Whether you're investing in a new Bluetooth stereo, Android Auto and Apple CarPlay radio, it all starts by removing your old unit. To do so, you'll need the right keys and pins to release it. Installation isn't as simple as slotting the new radio in. You'll need to ensure you have the proper wiring and fixings, connectors and harnesses.
