of adolescence is to separate from one's family as one emerges into an independent young adult. A part of this process is coming to terms with specific feelings about one's family.

Relationship Development - Stanford Children's Health

In our lab we are interested in understanding how experiences during adolescence influence teen's social and behavioral development. We are particularly interested in the impact of family and peer relationships on the development of adolescents' social competence and involvement in risky behaviors, such as delinquency.

The Adolescent Relationships - Welcome

An interplay between negative family relationships on one hand, and developmental conflicts on the other, in producing adjustment problems in adolescents whereby the corresponding tasks do not become fulfilled. The same results emerge from faulty relationships between adolescents and authority figures and systems in the wider society.

THE ADOLESCENT IN RELATIONSHIPS: FAMILY AND AUTHORITY

Adolescence is an important developmental phase along the path to adulthood, years during which youth become increasingly independent from their families. 1 Yet parents and other family members still play a critical role in the promotion of adolescents' well-being, by providing a positive support system within which youth can explore their changing identity. 2 There were 25 million children aged 12 to 17 in the United States in 2013, living in diverse family environments.
