Great for beginners and serious amateurs, Understanding Shutter Speed is the definitive handy guide to mastering shutter speed for superb results. The first book in the Understanding Photography series, Understanding Exposure, was a runaway best-seller, with more than 250,000 copies sold.

### Understanding Shutter Speed : Creative Action and Low ...

Short shutter freezes the action because the shutter opens and closes so quickly that the action doesn't have time to change before the image is captured. Let's not forget that shutter speed is the amount of time that light strikes the sensor.

### Camera Basics: Understanding Shutter Speed - Photography ...

Next to ISO, choosing the right shutter speed is the most important element. For most outdoor action-filled shots, shutter speeds of 1/500 or 1/1000 sec. are the norm, and for many experienced shooters, getting to these 1/500 and 1/1000 sec. exposures is often the direct result of using the right ISO.

### Understanding Shutter Speed: Creative Action and Low-Light ...

But the faster shutter speed of the one on the right freezes the water in mid-fall; something you can't distinguish with the naked-eye. (You can click the images to see them larger). Which you prefer is a creative choice; you get a sense of action on the left; on the right you get a surprising image, but no sense of movement.

### Understanding shutter speed : creative action and low ...

Shutter speed: 1/1600th second (a fast shutter speed) All of the above is achieved by simply controlling the shutter speed. In summary, quick shutter speeds freeze action, while long ones create an effect of motion when you photograph moving objects.

### Understanding Shutter Speed for Beginners - Photography Basics

We can select a fast shutter speed that freezes any action in a photo, or we can select a slow shutter speed that introduces 'motion blur' to any moving objects within our image. Combining a panning motion of the camera (left to right, or right to left movement) with a slow shutter speed can be used to give a sense of speed, as in the car photo that opens this article.

STEP 1: The shutter speed setting still remains the most important setting when doing water action photography. You want to stick with a fast shutter speed when attempting to capture moving water. I'd recommend starting with 1/2000 sec. STEP 2: Set your ISO to Auto. When taking pictures of kids, shooting in full Manual can be a challenge.
