Your period comes back when you're not pregnant anymore. When in life do periods start and stop? At some point during puberty, blood comes out of your vagina, and that's your first period. Most people get their first period between ages 12 and 14, but some people get them earlier or later than that.

What is Menstruation? | Get Facts About Having Your Period

The Early Modern Period is the first third of the Modern Period and is often used with the parent categorization. It starts with the invention of the printing press, covering the voyage of Christopher Columbus in 1492 and, more generally, the establishment of a more global network. It ends in 1750 with the beginning of British industrialization.

History by period - Wikipedia

Amplitude, Period, Phase Shift and Frequency. Some functions (like Sine and Cosine) repeat forever and are called Periodic Functions.. The Period goes from one peak to the next (or from any point to the next matching point):. The Amplitude is the height from the center line to the peak (or to the trough). Or we can measure the height from highest to lowest points and divide that by 2.
